

SCAI: NEW PRACTICE-CHANGING PERIPHERAL & CORONARY IVL DATA

Learn about the 1-year results from the randomized Disrupt PAD III trial and 1-year sex specific outcomes with coronary IVL at SCAI

MAY 19 THURSDAY

8:20 AM - 8:30 AM 

Centennial I Ballroom Level (LL1)

IVL for Peripheral Artery Calcification: 1-year Outcomes from the Randomized Disrupt PAD III Trial

William Gray, MD, FSCA, Main Line Health

11:15 AM - 12:15 PM 

Regency VII Ballroom Level (LL1)

SYMPOSIUM

LATE BREAKING NEWS AND EVIDENCE FOR IVL

IVL overview & reimbursement

Sahil Parikh, MD, Columbia University

PAD III RCT results

William Gray, MD, FSCA, Main Line Health

Real world application of IVL in SFA/Pop

John D. Corl, MD, Ohio Heart and Vascular Center

CFA case series

Peter Soukas, MD, The Miriam Hospital

Panel Discussion

MAY 21 SATURDAY

12:00 PM - 12:30 PM 

Grand Hall Foyer, Exhibit Level - LL2 (D-8)

Sex-specific OCT characterization of IVL treatment of calcified coronary lesions: Patient-level pooled analysis of the Disrupt CAD OCT sub-studies

Nadia Sutton, MD, University of Michigan

1:30 PM - 2:00 PM 

Grand Hall Foyer, Exhibit Level - LL2 (E-19)

Sex-specific 1-year outcomes in coronary IVL for treatment of severely calcified coronary lesions: A patient-level pooled analysis of the Disrupt CAD III and CAD IV studies

Alexandra Lansky, MD, Yale University

12:30 PM - 1:30 PM 

Regency VI Ballroom Level (LL1)

SYMPOSIUM

HOW IT STARTED VS HOW IT'S GOING: CORONARY CALCIUM MODIFICATION OUTCOMES IN MEN VS WOMEN

Women vs. Men: What are the clinical differences, and can we treat them equally

Dawn Abbott, MD, Rhode Island Hospital

Role of IVL in Ca⁺⁺ modification in females: CAD pooled gender analysis 1yr data

Alexandra Lansky, MD, Yale University School of Medicine, Yale University

Calcium characteristics by gender - What does the imaging show?

Disrupt CAD pooled OCT analysis
